Location: W.A Harriman Campus, Bldg 9 (Albany, New York), Office based - travel required up to 30% during field season (May – November)

Description

The New York State Office of Renewable Energy Siting (the Office) is seeking a Renewable Energy Siting Specialist 1 with two or more years of experience in the fields of wetland biology and wetland delineation who is eager to work with the Office's subject matter experts, project managers, and legal counsel. The candidate will coordinate and conduct site inspections to validate wetland delineation boundaries, review applications for large-scale renewable energy projects and communicate regularly with internal and external teams. The preferred candidate should have experience with GIS, wetland plant ID, previous delineation experience and familiarity with utility scale solar and wind development. Telecommuting currently permitted up to 50% of full time.
